

THE ATLANTIC HOTEL
Ft Lauderdale Beach

To Whom It May Concern:

The Atlantic Hotel has been using Eco Tabs for six months. This is a trail period that we will continue for at least 18 months total. So far the product has worked well and we have not had to pump our grease traps. Jeff and his team have been very hands on with the whole process. They come out about every 6 weeks and inspect the traps and add product if needed. So far we are very pleased with the product and its outcome. This has been a great addition to our list of green products that we implement and use at the Atlantic.

Sincerely

Charles Bart Smith
Director of engineering
